

Engineering

Master's Program

Master of Science in
Engineering

The Master of Science in Engineering program is designed for students who wish to pursue a career in engineering or research. The program provides a strong foundation in the fundamentals of engineering and offers a variety of specialized tracks.

Students in the program will complete a thesis project and a comprehensive exam. The program is flexible and allows students to tailor their studies to their interests and career goals.

For more information about the program, please visit our website or contact our admissions office.

The Master of Science in Engineering program is a two-year program. Students must complete 36 credit hours, including 12 credit hours of thesis research. The program is designed to provide students with the knowledge and skills necessary to succeed in the engineering profession.
